THE PATENT OFFICE

Patents and Designs

Calcutta, the 28th October 1967

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

7th October 1967

112674. W. Heusser. Process of control of secondarily activated acting mass.
112675. Council of Scientific and Industrial Research. Simultaneous inter-communication system.
112676. H. B. Khimji. Improvements in or relating to diaphragm valves.
112677. P. D. Sidhva. Improvements in or relating to telescopic double chamber hydraulic shock absorbers.
112678. H. K. Ahuja. Improvements in or relating to combined condensers for use with the delinter machines in the ginning and cotton seed processing factories, oil mills or the like.
112679. G. A. Grandi. Device for the formation of the weft in bobbin-less shuttle looms.
112680. Veb Leuna-Werke "Walter Ulbricht". Process for the production of α , α -dichlor-propionitrile. (23rd January 1967).
112681. Philips India Limited. Improvements in/or relating to lampholders starterholders, connector blocks, switches, sockets and like electrical appliances.
112682. Veb Filmfabrik Wolfen. Process for the manufacture of ethers of polyhydroxy compounds. (23rd June 1967).
112683. The British Petroleum Company Limited. Improvements in or relating to the cultivation of micro-organisms. (24th October 1966).

112684. Glanzstoff Aktiengesellschaft. Process for the production of polyamides with ether bonds. (17th July 1967).
112685. International Standard Electric Corporation. Crossbar multiselector with mechanical hold.
112686. The Gulf Coast Institute of Research and Technology, Inc. Marine protein concentrate.
112687. The Dunlop Company Limited. Improvements in or relating to polyurethane foams. (14th October 1966).
112688. The Firestone Tire & Rubber Company. Process.
112689. The Firestone Tire & Rubber Company. Method or process.
112690. The Firestone Tire & Rubber Company. Product and process.
112691. Becker Drilling (Alberta) Ltd. Method and apparatus for impact drilling of overburden. Double-walled drill pipe [Divisional date 22nd January 1966].
112692. Becker Drilling (Alberta) Ltd. Method and apparatus for impact drilling of overburden. (Drill-fit). [Divisional date 22nd January 1966].
112693. Becker Drilling (Alberta) Ltd. Method and apparatus for impact drilling of overburden. (Recovery of drill pipe) [Divisional date 22nd January 1966].
112694. V. V. Babu. A positive displacement rotary pump.
112695. A. A. Patankar. Slotted lug for soldering.

9th October 1967

112696. Council of Scientific and Industrial Research. Improvements in or relating to the production of amylase (diastase) from fungi.
112697. A. K. Bajpai. A device for protecting polyphase induction motors against possible damage due to voltage imbalance in the supply.

112698. U. Banerji. Improvements relating to internal combustion engine.
112699. Allied Chemical Corporation. Sulfonation process improvements.
112700. Allied Chemical Corporation. Polyisocyanate compositions.
112701. The Gillette Company. Strip curvature sensing apparatus.
112702. The Gillette Company. Method and apparatus for treating a continuously moving steel strip.
112703. The Gillette Company. Defect identifying apparatus for steel strip.
112704. The Gillette Company. Method and apparatus for processing razor blades.
112705. The Gillette Company. Improvements in or relating to the loading of strips into cartridges therefor.
112706. The Gillette Company. Method and apparatus for segmenting continuous strip material.
112707. Imperial Chemical Industries Limited. A process for the manufacture of new β -carboline derivatives. [Divisional date 30th August 1965].
112708. The Dunlop Company Limited. Improvements in or relating to methods of extrusion. (15th October 1966).
112709. Sumitomo Chemical Company, Ltd. Penta-chlorobenzylidenamine derivatives.
112710. Sumitomo Chemical Company, Ltd. Fungicidal Composition.
112711. Varta Pertrix-Union Gesellschaft Mit Beschränkter Haftung. Leakproof galvanic cell.
112712. Ciba of India Limited. Process for the manufacture of benzheterocyclic compounds. [Divisional date 9th December 1966].
112713. Ciba of India Limited. Process for the manufacture of benzheterocyclic compounds. [Divisional date 1st September 1967].
112714. Sandoz Ltd. Improvements in or relating to organic compounds. (13th October 1966).
112715. Rank Xerox Limited. Xerographic copying apparatus.
112716. Dow Corning Corporation. Treatment for fibrous materials.
112717. The Upjohn Company. Herbicidal compositions.
112718. The Upjohn Company. Herbicidal compositions.
112719. The Upjohn Company. Herbicidal compositions.
112720. Alpine Chemische Aktiengesellschaft. New copolymers, their production and uses.
112721. Hokko Chemical Industry Co., Ltd. Piomycin and the production thereof.
112722. Sandoz Ltd. Disperse dyes of the monoazo series, their production and use.
112723. Ciba Limited. Manufacture of new amines.
112724. W. J. Wallace Systems, Inc. Unloading machine for tankers and the like.
112725. R. G. DePenning. Linear grate for shaft kilns.
112726. Roussel-Uclaf. Novel 4, 5-seco gonane derivatives and a process for the preparation thereof. (8th October 1964). [Divisional date 30th September 1965].
112727. N. V. Philips Gloeilampenfabrieken. Capacitor-charge transferring device.
112728. The Gillette Company. Strip curvature sensing apparatus.
112729. The Gillette Company. Method and apparatus for sharpening cutting tool edges.

112730. Gestetner Limited. Lithographic ink composition. (14th October 1966).

112731. The Fertilisers and Chemicals, Travancore Limited. A method of manufacturing dicalcium phosphate.

112732. Schering Aktiengesellschaft. Process for the manufacture of n-carbamoyloxyphenyl-carbamates.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of the Gazette of India give notice to the Patents Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8 Hastings Street, Calcutta, in the due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

103201. Council of Scientific and Industrial Research. A method for the production of lead zirconate titanate. Accepted on 29th September 1967.

Comprises calcining of powder mixture of basic lead carbonate strontium carbonate, zirconium oxide, titanium dioxide and cerium oxide.

103229. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to capacitors included in integrated circuits and methods of manufacturing such capacitors. Accepted on 30th September 1967.

The first electrode is constituted by a layer of semiconductor material, having a high impurity concentrative, a second metallic electrode and a zone of insulating oxide.

103345. Castrol Limited. Novel oil soluble additives for lubricating compositions. (8th January 1965). Accepted on 7th October 1967.

Lubricating composition comprising lubricating oil and an additive which is a reaction product of sultone with a compound containing at least one long alkyl chain linked through an ester, amide or imide grouping to a grouping having at least one basic nitrogen atom.

103535. Standard Telephones and Cables Limited. An electrical information transmission system. Accepted on 6th October 1967.

Wherein a transmitter includes means for generating an initial time-based electrical signal conveying information to be transmitted, in which generating means is coupled to a transmitting means by a coupling means.

104503. Heberlein & Co., Ag. A process for preparing linen-like fabric. Accepted on 25th September 1967.

Comprises contacting a cellulosic fabric with NaOH solution, winding the impregnated fabric onto a perforate drum and removing NaOH solution from fabric by passing water radially from interior of drum through the fabric.

104517. Standard Telephones and Cables Limited. Routing translator. Accepted on 25th September 1967.

Coordinate array of horizontal and vertical busses, the busses extending in one coordinate direction representing individual routes, means selectively connected across the intersections of said busses, means for selectively applying an interrogation voltage and means responsive to conditions of unavailability for energizing the particular busses.

- 104626 Bendix-Westinghouse Automotive Air Brake Company. Improvements in or relating to fluid pressure brake systems. Accepted on 30th September 1967.

Pressure released spring applied locking means for retaining the trailer brakes locked in applied position under certain predetermined condition.

104694. J. R. Geigy A. G. Production of chromium-containing reactive dyestuffs dyeing or printing fibrous or textile materials therewith and so dyed or printed material. [Addition to No. 95939]. Accepted on 4th October 1967.

Reacting a complex chromium compound with a metallisable diazodyestuff.

104695. J. R. Geigy A. G. Process for the production of chromium-containing active dyestuffs so produced, process of dyeing or printing therewith and so dyed or printed material. [Addition to No. 95939]. Accepted on 4th October 1967.

Reacting a complex chromium compound with a metallisable monoazo dyestuff.

104861. The Babcock & Wilcox Company. Method and apparatus for making fibres. Accepted on 6th October 1967.

Comprising means for supplying viscous material to be fiberized to a first location, means for moving a pair of fiberizing surfaces into contact with said viscous material at said first location means for moving said fiberizing surfaces apart so as to stretch said material into fibres and collecting the fibres thus formed.

104902. Farbenfabriken Bayer Aktiengesellschaft. Polyester moulding masses. (23rd December 1965). Accepted on 6th October 1967.

Characterised in the presence specified amount of aliphatic, optionally, substituted carboxylic acid in other suitable acids anhydride of the acids etc. whose magnesium salt has a specified solubility on the polyester moulding mass along with 0.75 mole of MgO per gram equivalent of total free acid group.

104983. African Metals Corporation Limited. Process for the production of medium to low carbon ferromanganese of low silicon content. Accepted on 6th October 1967.

Comprising the steps of reacting a molten synthetic reaction slag with an intermediate ferro-manganese alloy to produce a final low silicon, medium to low carbon ferro-manganese and a partially spent slag and reacting thus produced partially spent slag with fresh silico-ferromanganese to produce intermediate ferromanganese alloy.

105068. Societa' Edison. Process for the elimination of acrolein from acrylonitrile. Accepted on 6th October 1967.

Comprising absorbing acrylonitrile obtained by cerbulytic reaction between propylene ammonia and oxygen in water to obtain a solution of acrylonitrile having a pH between 7.5 and 11, heating the solution to 70°—150° and finally distilling the solution to obtain pure acrylonitrile.

106894. A. C. Cossor Limited. Improvements in detector circuits. (9th September 1965). Accepted on 6th October 1967.

Detector circuit including first and second transistors with their emitter electrodes connected together, a pair of terminals for the connection of an electrical source, one terminal being connected to the collector electrodes of the transistor or the anodes of the valves, means for applying input signal and biasing means for allowing the first transistor or the grid of the first valve to conduct during either positive or negative half cycles only of the input signal.

107108. Panelfold Doors, Inc. Foldable door with double bead hinge strip. Accepted on 6th October 1967.

Comprising a plurality of elongated panels disposed in edge to edge relation, each edge of each panel having groove means, a hinge strip.

107281. Caterpillar Tractor Co. Combined load cylinder and spindle for a welding machine. Accepted on 6th October 1967.

Comprising a tubular member with axial movement within the cylinder a spindle at one end of the member having chuck and bearing means.

107435. P. G. Gogate. Improvements in or relating to reciprocating pumps for lifting water. Accepted on 7th October 1967.

Characterised in that the main barrel of the pump is provided with a lining of a cementing material having a piston comprising a pair of washers, so held together that the edges of the washers touch the inner lining of the barrel while leaving some space in between them.

108228. Everest Appliances Private Limited. Garment drying apparatus. Accepted on 6th October 1967.

Comprising a cabinet, heating means within the cabinet, a protecting plate, a set of supporting brackets and a set of openings provided in the cabinet.
